

Solution Overview

Seamless sustainability and compliance at the push of a button.
Designed by refrigerant management pros, for HVAC/R operators.

**Every asset. Every regulation.
Every leak. Every step.**

Navigating the latest HFC regulations while managing HVAC/R systems across your ecosystem is challenging.
Trakref makes it easy.

1

OPERATIONS

Manage your HVAC/R assets, all in one place

Track HVAC/R assets and emissions data across all locations, maintaining detailed records of inspections, repairs, and service providers.

2

REGULATORY COMPLIANCE

Track every regulation, everywhere

Stay audit-ready and avoid fines by managing the latest refrigerant regulations, with built-in documentation and automatic alerts.

3

SUSTAINABILITY

Spot and stop Scope 1 fugitive emissions

Access data, analytics, and compliance tools to track emissions and simplify ESG disclosures.

Proven track record. Compliance you can trust.

12+ years of refrigerant management experience

10k+ locations supported by our platform

100k+ assets tracked on our platform

100% audit-ready compliance

“ Trakref does a great job of staying current on how regulations are changing and impacting our business. ”

- **Sam S.**
Program Owner, HVAC and Refrigeration Operations

Less compliance risk. More business impact.

Trakref makes it easy to ensure compliance across a range of **EPA, CARB, and SEC regulations**, reducing risks and fines while simplifying workflows and data entry for technicians and managers.

Latest Refrigerant Regulations

A compliance-informed rules engine enforces **real-time workflows** based on the **latest refrigerant regulations**, keeping businesses ahead of changes.

Compliance Center

Stay updated on **repairs, inspection deadlines**, and other key maintenance data.

Easier Regulatory Reporting

Instant reporting simplifies creating and submitting compliance reports to bodies like the EPA and CARB. **Just click and send.**

Asset Management

Centralized system for **tracking, managing**, and inspecting **HVAC/R assets** across locations and life cycles.

Work Order Management

Efficiently manages and assigns **maintenance tasks** while tracking status & history across all service providers.

Leak Rate Calculation & Management

Tracks **refrigerant usage** and **calculates leak rates**, ensuring maintenance and environmental compliance.

Customizable Reports and Analytics

Create personalized dashboards to monitor **key metrics, benchmarks**, and **performance indicators**.

Mobile Application

Boosts field operations with a mobile app for **asset tracking, work orders**, and **offline data entry**.

Integration Capabilities

Synchronize data between systems and **eliminate the need for duplicate data** entry.

Customer Support and Training

Live trainings available for your team and service providers to guide each step of the way.

Easy to Implement

Trakref is a **cloud-based platform** that is easy to launch & understand, and updates automatically.
