

SOLUTION OVERVIEW

The **only** audit-ready refrigerant management solution.

Take control of HVAC/R assets to make sustainability and compliance straightforward and integrated into your team's operations.

OPERATIONS

Manage your HVAC/R assets, all in one place.

Track HVAC/R assets and emissions data across all locations, maintaining detailed records of inspections, repairs and service providers.

REGULATORY COMPLIANCE

Track every regulation, everywhere

Stay audit ready and avoid fines by managing the latest refrigerant regulations, with built-in documentation and automatic alerts.

SUSTAINABILITY

Spot and stop Scope 1 fugitive emissions

Access data, analytics, and compliance tools to track emissions and simplify ESG discussions.

REFRIGERANT MANAGEMENT

Every asset. Every regulation. Every leak. Every step.

Navigating the latest HFC regulations while managing HVAC/R systems across your ecosystem is challenging. Use Fexa Trakref's cloud based refrigerant management software to guide your path.

12+ years of refrigerant management experience

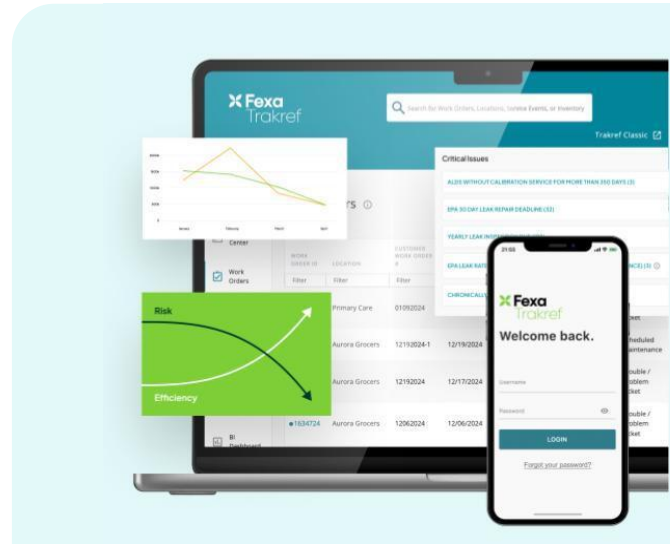

10k+ locations supported by our platform

100k+ assets tracked on our platform

100% audit-ready compliance

Less compliance risk. More business impact.

Fexa Trakref makes it easy to ensure compliance across a range of EPA, CARB, and SEC regulations, reducing risks and fines while simplifying workflows and data entry for technicians and managers.

Comply with Confidence, Adapt with Ease

Stay ahead of a range of state and federal refrigerant regulations to comply with evolving requirements, address legal risks and avoid fines.

Optimize Spend

Manage and maintain HVAC/R assets across their life cycles, and spot and stop costly refrigerant leaks to minimize waste.

Meet Sustainability Goals

Reduce your organization's Scope 1 fugitive emissions with the data and tools necessary to track and prevent greenhouse gas leaks.

Report with One Click

Track leak rates, inspection deadlines and repairs across your ecosystem, in real time, and instantly generate reports required by regulatory bodies like the EPA and CARB.

Orchestrate HVAC/R Maintenance & Techs

Manage and assign HVAC/R maintenance WOs, track repair status, and make it easier for techs in the field track and report on all the right information about your asset inventory.

Extend Visibility to Other Systems & Tools

Seamlessly synchronize Trakref data in and out of Fexa's CMMS or any third-party system to optimize operations and accuracy.

“Trakref does a great job of staying current on how regulations are changing and impacting our business.”

—Sam S., Program Owner, HVAC and Refrigeration Operations
